

## **AFFIDAVIT OF SANITARY CONNECTIONS**

Construction Address: \_\_\_\_\_

I have been notified that the construction of a house with floor, basement or crawl space drains which are lower than the ground surfaces surrounding the building shall not be connected to the building sanitary sewer. No floor, which is lower than 1 ft. above the top of the nearest downstream sanitary sewer manhole, shall be connected by direct drainage (gravity) to the building sanitary sewer.

I understand that it may be necessary to install a sewage ejector pump to discharge the sewage at an elevation 1 ft. above the manhole elevation.
