

*Lexington-Fayette Urban County Government
Stormwater Quality Projects Incentive Grant
Program Summary of Grant Projects—FY2016*

Class B (Education) Grants

1. **Bryan Station High School (Fayette County Public Schools)** **Grant Amount: \$2,500.00**
Target Watershed: North Elkhorn
The project involves the design and installation of a rain garden expansion on the Bryan Station Middle School campus. The project also incorporates the rain garden into the environmental education curriculum and provides community outreach. Bryan Station High School AP Science students will host an evening workshop for students and their families to visit the rain garden and hear from local experts on the importance of stormwater quality.
2. **Growing Together Preschool, Inc.** **Grant Amount: \$9,030.00**
Target Watershed: Town Branch
The purpose of the project is to provide stormwater education to students and neighbors of Growing Together Preschool. The school will work in conjunction with the Klausing Group to design and construct two rain gardens at the school to be utilized by students, staff, parents, family members, and the community members to demonstrate the positive effects rain gardens have on the community.
3. **Living Arts and Science Center, Inc.** **Grant Amount \$34,920.00**
Target Watershed: Town Branch and County wide
The purpose of the project is to develop new and expand existing curricula of LASC programs that focus on water quality, stormwater issues, and water conservation. LASC anticipates reaching over 6,000 children directly through their various programs, as well as regular classes and workshops. They also anticipate reaching an additional 12,000 to 15,000 people through field trips and activities at LASC, on their website, and in handouts.
