Please visit playgolflex.com for course hours and details.

What is Foot Golf?
Foot golf is a unique blend of soccer and golf. Foot golf is played using the basic model of golf, with a tee box, green, bunkers, hazards, a similar scorecard, and 9 or 18 holes to play. The main differences are the cups, which are 21 inches in diameter, the ball (a #5 soccer ball), the shorter holes, and the fact that the players kick the ball instead of using clubs. The goal? Get the ball in the hole with the fewest strokes (kicks) possible. Get more details below and then get your foot in the game!

Foot Golf Basics
Players should wear indoor soccer shoes or tennis shoes. Cleats are not permitted. Proper attire is required (shorts and shirts). Players may bring their own #5 soccer ball or rent one from the pro shop.

Disc Golf

Also known as frisbee golf, disc golf was invented in the early 1900’s when Ronald Gibson and some school friends in Bladworth, Saskatchewan, Canada threw some tin lids into four-foot wide circles drawn in the sand. They called it Tin Lid Golf. The sport was resurrected in the 1970’s as disc golf.

Disc golf as we know it today involves throwing a disc at a target while using rules similar to golf. Players start at a designated tee area, throw their disc toward a target and continue from the landing position until their disc has reached the target. The goal is to use the least amount of throws by the end of the game.

We offer three 18-hole disc golf courses – Shillito, Veterans and Jacobson Parks. The Shillito Park course is a Mach 3 course with concrete tee pads and alternate pin placements. There are elevation changes with lots of trees. Hole #1 is just to the right of the pool entrance. Veterans Park course was built entirely by volunteers. Like Shillito, there are elevation changes with plenty of trees. Most of the holes are in the woods. Jacobson is 7,050 feet long and features a rolling topography and has a lot of variety. The front nine is wooded, with three holes in a large pine forest. The back nine is open with stands of mature trees. A nine–hole course is located at River Hill Park, 3800 Crosby Drive. This course features several different elevation changes and plenty of trees. This is a great course to learn how to play and practice your game.

ESP is currently offered at the following elementary schools: Athens-Chilesburg, Garrett Morgan, Julius Marks, Mary Todd, Maxwell, The Academy at Millcreek, Northern, Stonewall and Yates.

Each ESP site is managed by a site coordinator and maintains a staff-to-student ratio of no more than 1:15. All site personnel receive in-service training and all staff must receive required health tests and pass criminal background checks.

Staff at each site plan daily activities for students and coordinate curriculum to meet the Kentucky All Star Standards. Some of the many activities offered through ESP include homework assistance, games, arts and crafts, reading, nature projects, and more.

The Extended School Program (ESP) and the Recreation Enrichment and Learning Program (REAL) are both school programs that offer affordable, high-quality childcare. Admission to both is on a first-come, first-serve basis. Each year, students must reapply to be accepted into the programs. A limited number of ESP scholarships are available per site. Fill out and return the income eligibility form on Parks policies page to apply for a scholarship. Both the ESP and the REAL program are partnerships between the Lexington-Fayette Urban County Government and the Fayette County Public School system.

**SKATE PARKS**

Lexington’s skateparks allow for skaters to practice in a modern and safe environment. Lexington Parks and Recreation strongly recommends that safety equipment be used at all times and patrons not use facilities in inclement weather. All facilities are free and open to the public. All skate parks will close each evening at dark.

**BERRY HILL SKATE PARK**
3489 Buckhorn Drive
At 18,000 square feet, Berry Hill is Lexington’s largest skate-park and features obstacles that will appeal to advanced skateboarders and bikers. Amenities include a flow bowl, snake run, street section, stairs and rails. Built by Dreamland Skateparks, LLC, one craftsman, a Lexington native incorporated Bluegrass-themed elements into the design. Some of the concrete in the skate-park was stamped with horseshoes and stylized to mimic limestone, and one of the metal rails features galloping thoroughbreds.

**KIRKLEVINGTON SKATE SPOT**
369 Redding Road
Kirklevington Skate spot is 3,600 square feet and features a variety of “street” elements for skateboarders instead of ramps and other typical obstacles. This skate park was designed to offer obstacles and components that are similar to those found in downtown and other urban settings. This facility includes skate-able benches, jersey barrier, grinding rail, concrete boxes and a variety of other obstacles for beginners and more advanced skaters.

**VALLEY PARK SKATE SPOT**
2077 Cambridge Drive
Valley Park Skate Spot is Lexington’s newest skating facility. It is 6,200 square feet and has a variety of angled banks, ledges, rails and hump ramps more similar to a sculpture garden than a skate-park.

**WOODLAND SKATE PARK**
600 East High Street
This 12,000 square foot facility features a variety of ramps, platforms, bowls and pipes. It offers a great skating experience for beginners while at the same time it challenges the most experienced skaters. This is a skate park only - not a bike park.

Lexington has many miles of trails which offer a great way to lead a healthier and more active lifestyle. Whether you enjoy hiking, walking, running or biking these trails allow individuals the opportunity to rejuvenate and maintain ones mind and body, all while having fun. Take a trip to one of our nature parks and enjoy bird-watching, stargazing or hiking with your family. Visit one of the trails located in your neighborhood and walk your dog, in-line skate with your children or ride a bike. We encourage you to get out and enjoy the beauty of your local parks and trail system.

A **SHARED USE TRAIL** is paved and designed for activities such as running and walking as well as higher speed activities like bicycling and skating. They are 10–12 feet wide.

A **WALKING TRAIL** is paved and is at least 8 feet wide. For everyone’s safety, bicycling and skating at greater than a fast walking speed is not allowed on walking trails.

**PATHS** are narrower than 8 feet and may include sidewalks, gravel paths and grass paths.

**HIKING TRAILS** are generally single person width, natural surface and for pedestrians only. Hiking trails may range from easy (level grades and shorter distances) to difficult (steep grades and/or longer distances).

It is recommended that you select hiking trails appropriate for your level of physical ability.
